

For Immediate Release

LEVROIL Includes Advanced Biodegradable Cleaner/Degreaser

Pittsburgh, PA - October 1, 2009 – LEVROIL LLC announced today, after much research it has finally discovered a biodegradable cleaner/degreaser that performs as advertised and will now include this advanced formula into its product lineup. The product will be marketed under the name Global Kleen™.

LEVROIL has used many cleaner/degreasers in the past as most companies and individuals have over the years. However, this particular formula not only promises but delivers as advertised. A few years ago, the U.S. government excluded key ingredients that made certain cleaner/degreasers better than fantastic. Unfortunately, some of these ingredients were carcinogenic in certain ratios and extremely poor for anyone's health. These ingredients in their deadly ratios were quickly discontinued and made the formulas nearly useless.

LEVROIL has not only discovered a formula that lives up to the fantastic formulas of the past but is also biodegradable. The product is designed for industrial use, approved by the USDA (code A1) for food environments, approved by the U.S. Coast Guard for its readily biodegradable state, Kosher approved, and passes the EPA's Chronic Toxicity Test. It doesn't stop there. The formula is even considered typically "Nuclear Quality" by General Electric standards.

LEVROIL is excited to bring Global Kleen™ aboard and has very high hopes of its credibility and performance.

About LEVROIL LLC

LEVROIL LLC is an online premium industrial lubricant e-commerce business and was created to serve as an outlet to the rising cost of lubricants in the market today. LEVROIL's strategy is to keep pricing for high value products competitive and combine that with an easy to use ordering system. We accomplish this by maintaining low overhead and pass the savings to the customer. Together, this combination is aimed to meet the needs of manufactures and end-user customers alike. LEVROIL offers a line of Industrial, Food Grade, Biodegradable and specialty products. More information about LEVROIL LLC can be found at <http://www.levroil.com>.
